Student Clicker

A credit card sized ABS with polycarbonate body comes with display and buttons to respond like Y/N, up and down button, A- F, 0-9. Can also store upto 60, 000 answers. With communication range upto 100 meters, connects with teacher's clicker via wireless receiver seamlessly and without any delay.

Teacher's Clicker

it comes in same material as student clicker. It has options like next and back questions, lifeline providing options, question start and end, etc. Teachers can quickly assess the answers and can quickly provide feedback to students.

Wireless Receiver Module

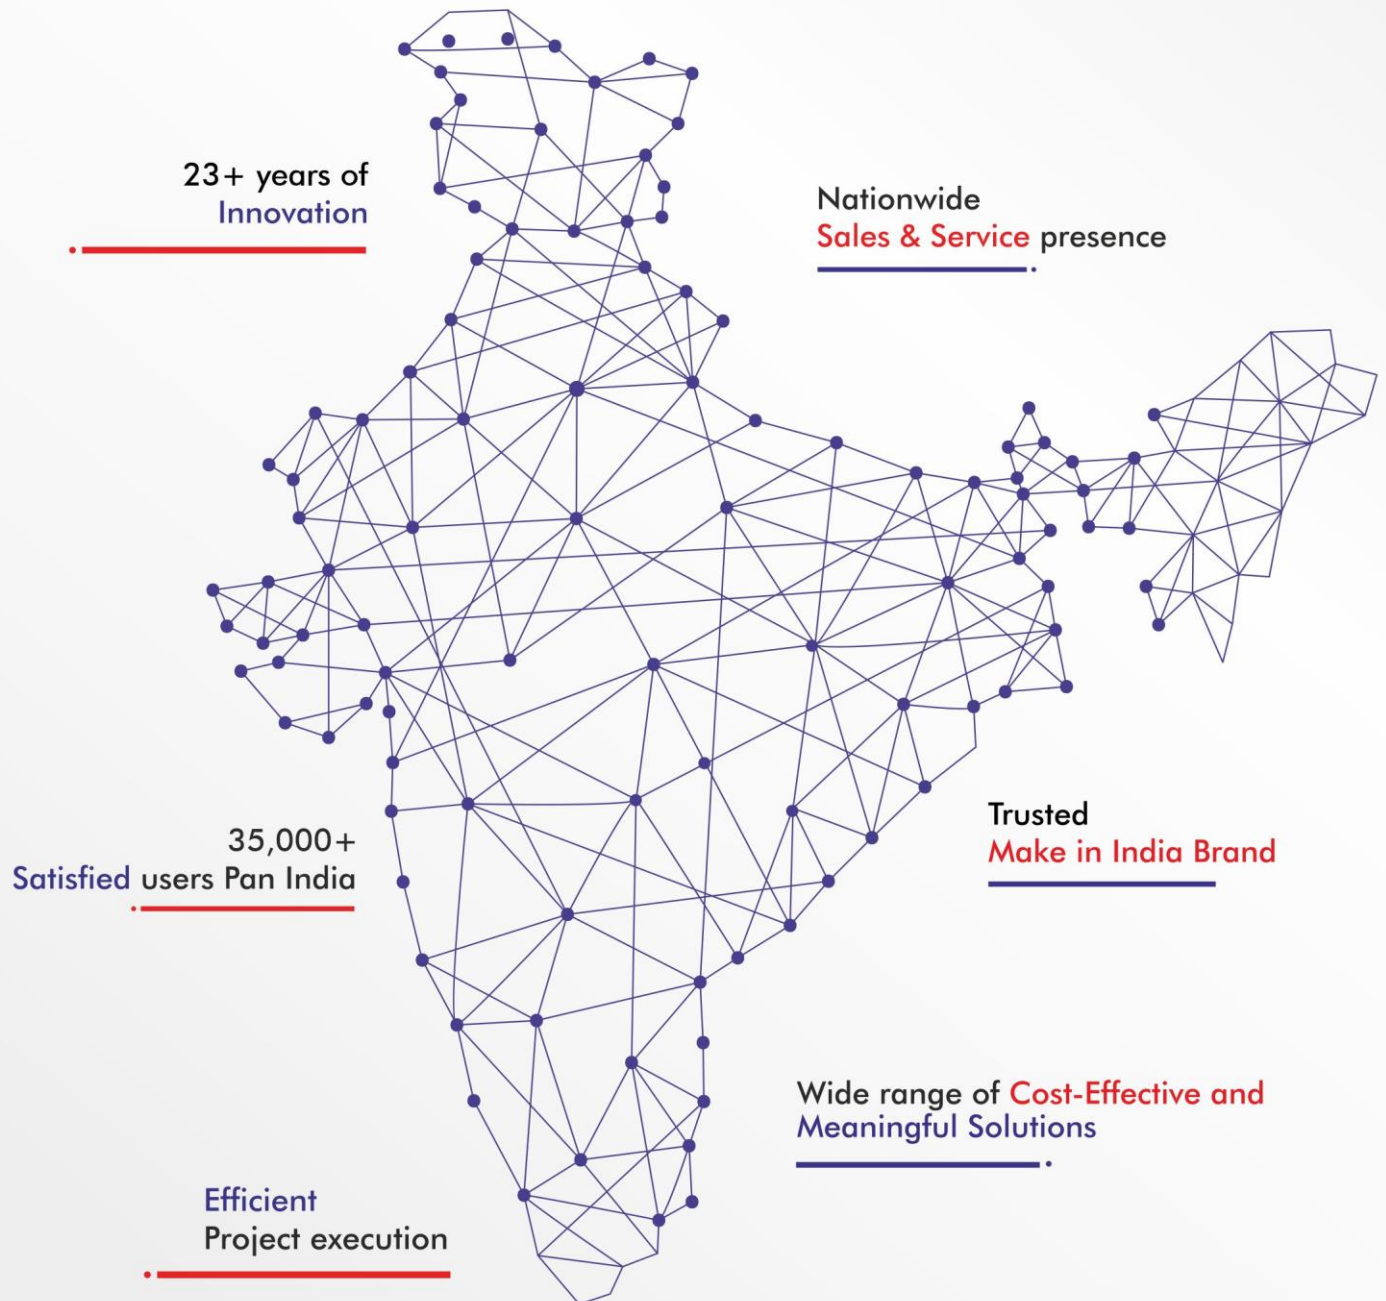

It is a dual omnidirectional external antenna with red and green light indicator, etc. It plays a role of mediator between teacher and students. Helps in receiving responds quickly, hence winners name come on display.

SRS as solution

it is a complete solution loaded with n number of features. It supports NFC binding, scoring feature, single and multiple-choice questions, offline mode, etc.
