### Powerful 2 x 10 W Speakers

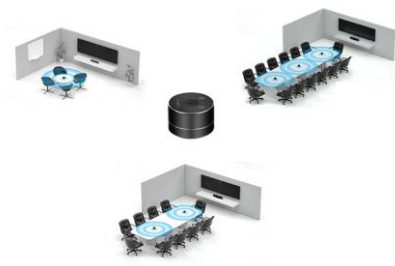

Powerful inbuilt speakers with an integrated full duplex speakerphone combined with technology like echo and noise cancellation for crystal-clear audio. Includes voice prompters with frequently used functions like Mic Mute, Speaker Mute, Volume Up/Down, Expansion Microphone Switch On/Off, etc. for easier operation. With standby up to 6 months and operating time of 4.5 hours, it offers a reliable audio system for any size of conference.

### Compact Omni-Directional Microphones

Combining flexibility and convenience, the solution includes three omni-directional microphones that combines noise and echo cancellation technology for comprehensible and crystal-clear audio output. Equipped with Howling Suppression and Dynamic Noise Suppression Technology, it provides opportunity for an impactful conferencing experience even in a noisy environment. Promising high reliability via RF2.4Ghz wireless connection, it operates for up to 4 hours with a single charge.

### Scalable, Flexible Solution

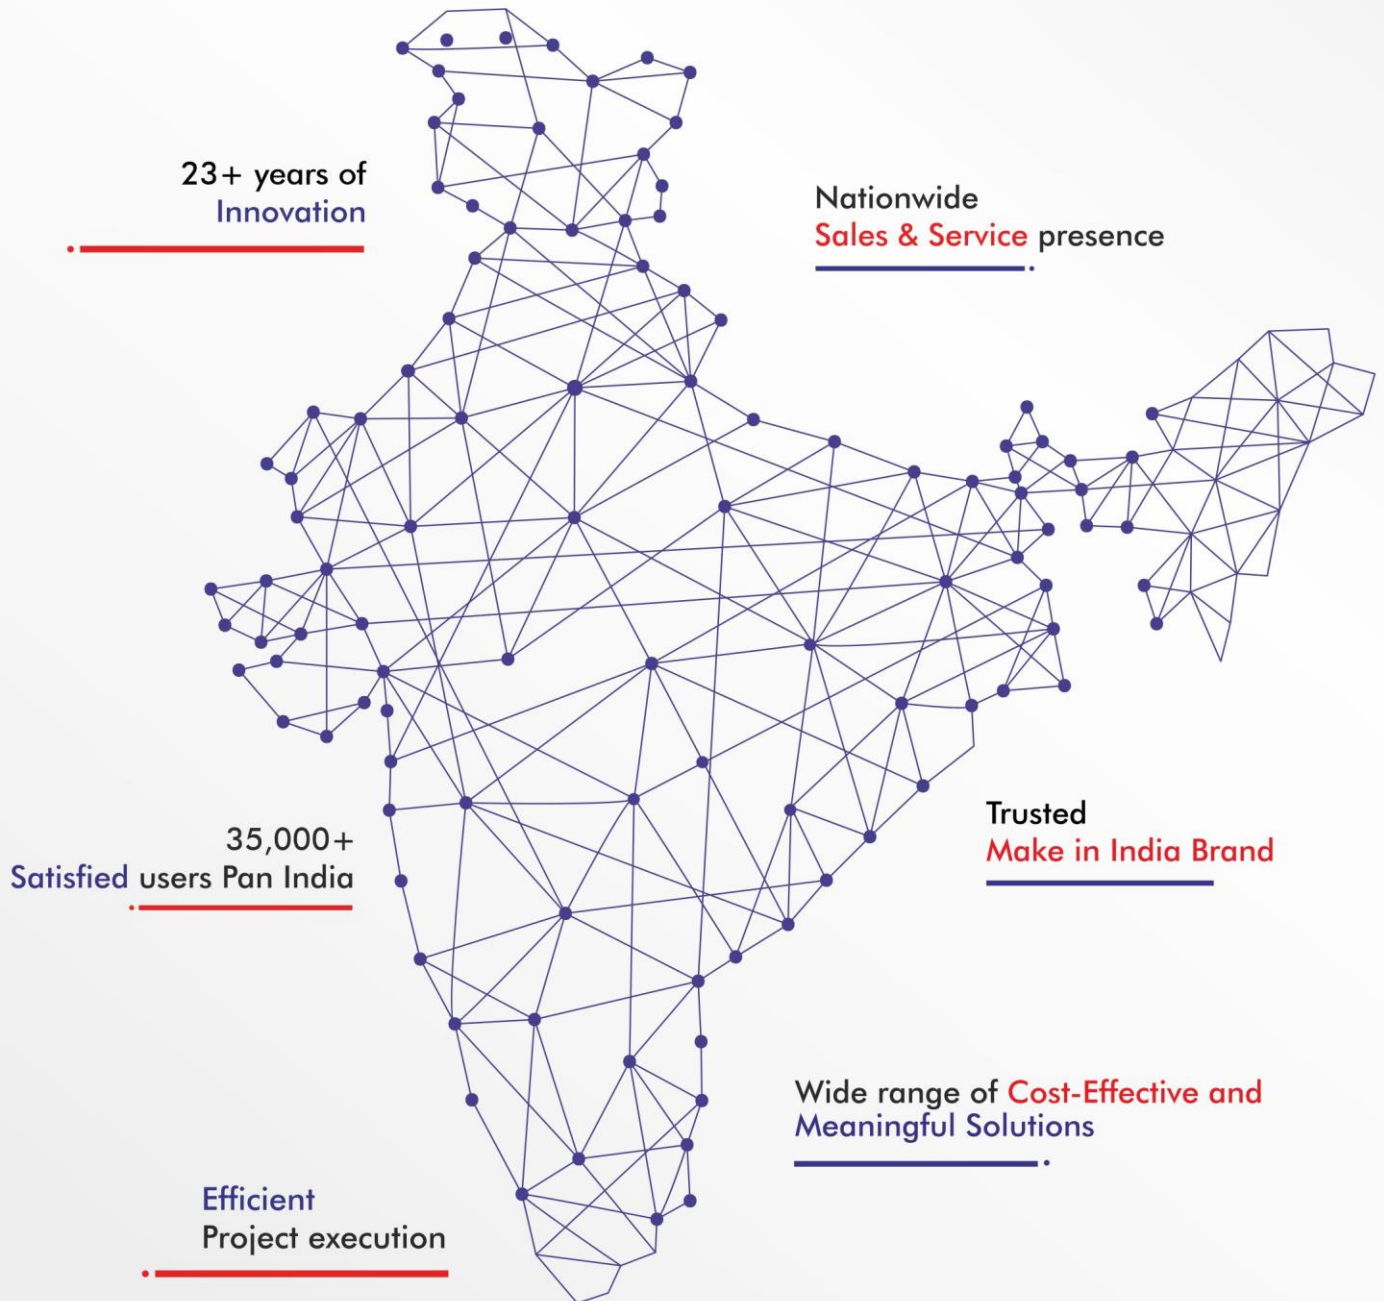

Greater functionality comes packed in a compact, small form-factor in this solution. This solution can be customized and deployed as per the requirements in just few simple steps. Depending on the size of the conference, number of omni-directional microphones can be added or removed or arrange in multiple deployment setups. This USB Plug & Play solution eliminates the need for using complex traditional connection methods that were tedious and time-taking. It comes with a Wireless Dongle (RF5.8GHz) for inter-connection for web conferencing software without any driver.

### Charging Tray for Contact Charging

The solution also includes a USB type-C charging tray that offers seamless and de-cluttered contact charging for the Omni-Directional Microphones. Simply connect the tray to a USB Type-C charger to power up your microphones when not in use. It also supports fast charge for better usability.
